Please record my comment(s) about the Broadway Boulevard, Euclid Avenue to Country Club Road project.

Thanks for this opportunity to comment: The idea of widening Broadway is wrong for several reasons: 1) Congress is too narrow to accomodate more lanes; 2) The city can't maintain the roads it has built; 3) the destruction of churches & other historical structures is wrong. Thank you.

I'm a long time Sam Hughes/Tucson resident and am concerned that the Broadway widening plans as originally envisioned are no longer feasible, valuable, or conducive to a progressive or sustainable future Tucson. I would hope these will be re examined with an eye to maximum "quality of life" enhancements for residents and businesses.

Honor the Historic Sunshine Mile and support all local businesses. The renovation of Broadway Blvd. should accommodate alternative modes of transportation. No car access for 8 lanes. Keep current automobile access - no widening. Increase safety of pedestrian & bicycle coniders. Use principles of "Road Diet" - slow down traffic.

Why is more space for more traffic needed???

Is there any information as to the economic losses of existing businesses vs the value of moving more cars/buses along a wider street??

1. Please include "green space" between east and west traffic
2. Please stagger the stop lines at lights so the right lane can see if its safe to turn right on a red light. That way the car in the left lane does not block the line of sight. (This comment is for all over town also.)

I ride the #8 bus to downtown to & from Cherry & Broadway. The current pedestrian controlled light at that intersection is the only safe way I have to cross Broadway each evening. I am concerned that light will be eliminated or Broadway will be so wide to make crossing it dangerous or scary, like Campbell at Broadway.

Broadway is the only East-West direct route to downtown and its current purpose is as commuter route. However no committee member has interests to the east or west of the small area and only 2 posters in entire presentation are traffic information. Those stats show 50,000 daily trips will be impacted without representation. If you clog road with bikes/light rail, what is the alternative for commuters, Downtown, El Con or points east.

Please record my comment(s) about the Broadway Boulevard, Euclid Avenue to Country Club Road project.

1. Project was part of a package that was voted on and approved by voters
2. Broadway is and always has been a pass through corridor.
3. People have established business in the houses because no one wanted to live there. Houses should not have been zoned commercial if you wanted a residential feel. 4) Limited number of structures have redeeming architectural value.

MOST IMPORTANT

5) Intersection geometry is critical to project success. as opposed to number of lanes Public meeting needed to have some idea of design element. Unfortunate!!
