

**The City of Tucson has received a \$400,000
Environmental Protection Agency (EPA)
Brownfields Community-wide Assessment Grant**

Grant funding is available to perform Phase I and Phase II Environmental Site Assessments (ESAs) on public and privately-owned properties, within the project boundary areas shown on the map (opposite page).

A Phase I ESA typically costs between \$1,800 and \$3,500, and Phase II ESAs can cost upwards of \$20,000 or more.

An Asbestos Survey and Lead-Based Paint Survey can be conducted in conjunction with the Phase I ESA.

Environmental Site Assessments conducted will become a public record.

If you wish to have a property assessed, please contact the respective contact listed below to discuss.
