

EXHIBIT LT-7 Future Growth Scenario Map

Map and legend colors may vary slightly from each other. Colors may also vary depending on printer used.

This concept map is for illustrative purposes only identifying a range of potential areas of opportunity throughout the City. It does not constitute zoning regulations, establish zoning district boundaries, or indicate official city policy relating to specific sites. The categories and colors must be interpreted based on the policies contained in Plan Tucson.

**Building Blocks**

(See Exhibit LT-8 for general descriptions of the building blocks.)

- Existing Neighborhoods
- Neighborhoods with Greater Infill Potential
- Neighborhood Centers
- Downtown
- Business Centers
- Mixed-Use Centers
- Mixed-Use Corridors
- Campus Areas
- Industrial Areas
- Houghton Corridor Area
- Southlands
- Potential Annexation Areas

- Existing Parks/Open Space
- City of Tucson Boundary

**From Major Streets and Routes Plan**

- Future Roads
- County Major Routes
- Major Highways
- Major Roads

**From 2040 Regional Transportation Plan**

- Planned Bus Routes (BRT, Express and Circulator)
- Planned Streetcar
- Planned Commuter/Intercity Rail

## EXHIBIT LT-8 Future Growth Scenario Building Blocks

<b>Existing Neighborhoods</b>	Existing neighborhoods are primarily developed and largely built-out residential neighborhoods and commercial districts in which minimal new development and redevelopment is expected in the next several decades. The goal is to maintain the character of these neighborhoods, while accommodating some new development and redevelopment and encouraging reinvestment and new services and amenities that contribute further to neighborhood stability.
<b>Neighborhoods with Greater Infill Potential</b>	Neighborhoods with greater infill potential are residential neighborhoods and commercial districts for which there is potential for new development and redevelopment in the next several decades. In some areas, entire new neighborhoods may be built. These neighborhoods are characterized by an urban scale that allows for more personal interaction, while providing safe and convenient access for all ages and abilities to goods and services needed in daily life. These neighborhoods include a mix of such uses as a variety of housing types, grocery stores and other retail and services, public schools, parks and recreational facilities, and multi-modal transportation choices.
<b>Neighborhood Centers</b>	Neighborhood centers feature a mix of small businesses surrounded by housing and accessed internally and from nearby neighborhoods by pedestrian and bike friendly streets and by transit.
<b>Downtown</b>	Downtown Tucson acts not only as a regional employment and administrative center, but also as a major hub for public transit services and connections (light and commuter rail, regional buses, streetcar). It is a vital pedestrian-oriented urban area that provides higher-density housing, retail, art and culture, and entertainment for its residents and those of greater Tucson.
<b>Business Centers</b>	Business centers are major commercial or employment districts that act as major drivers of Tucson's economy. These centers generally contain corporate or multiple-use office, industrial, or retail uses. Existing examples in Tucson include the University of Arizona Science and Technology Park, Tucson Mall, and the Tucson International Airport area.
<b>Mixed-Use Centers</b>	Mixed-use centers combine a variety of housing options, retail, services, office, and public gathering places, located close to each other, providing occupants of the center and the residents and workers in the surrounding neighborhoods with local access to goods and services. Public transit, bicycles, and walking will get priority in these areas although cars will still play an important role. Existing examples in Tucson include Williams Centre, Gateway Centre, and the Bridges.
<b>Mixed-Use Corridors</b>	Mixed-use corridors provide a higher-intensity mix of jobs, services, and housing along major streets. The businesses and residences within these corridors will be served by a mix of high-frequency transit options, as well as pedestrian and bicycle facilities.
<b>Campus Areas</b>	Campus areas include and surround large master-planned educational, medical, or business facilities. A fully-realized campus area serves the local workforce and student population and includes a range of housing, a variety of retail opportunities, and convenient transit options. Campus areas often accommodate businesses that are the spin-off of economic development opportunities generated by the primary employers. Existing examples include the University of Arizona, Pima Community College, Tucson Medical Center, Saint Joseph's Hospital, Saint Mary's Hospital, University Physicians Hospital, and the Veterans Affairs Medical Center.
<b>Industrial Areas</b>	Industrial areas are strategically located for efficient handling of intermodal freight movements. These areas support national and international freight movement through Tucson by connecting existing major regional commercial transportation routes, including railway, major highways, and the airports
<b>Houghton Corridor Area</b>	Development in the Houghton Corridor Area is to be master planned with a cohesive system of mixed-use centers and neighborhoods, providing a variety of housing types and densities, a compact development pattern, a transportation and circulation system that offers alternatives for mobility, and a regional open space system. A phased approach to development will provide for increased efficiency of infrastructure and services for residents.
<b>Southlands</b>	Southlands is a long-term growth area, formed predominantly by large tracts of undeveloped land located at the southeastern and southern perimeters of the city. A large portion of this area is administered by the State Land Department. Prior to releasing these lands for development, the State will initiate planning efforts to promote orderly phased development that reflects sustainable and innovative community design.
<b>Potential Annexation Areas</b>	Potential Annexation Areas are areas that the City of Tucson may be pursuing for annexation within the next decade, working with other local jurisdictions with the ultimate goal of having urban commercial and residential areas located within incorporated cities and towns.
