

## 1.0 Revised Site Plan

The site plan has been annotated to show the proposed revised carport location, now free of the west elevation of the dwelling.

The new location is shaded in blue. The previous location is still shown for reference. The carport has been modified to eliminate the storage structure, reducing its footprint and making it a more transparent structure.

Key existing landscape elements are shown to depict how the site is organized, and how it is approached by visitors.

Additional setback dimensions are shown.

Basic interior arrangement of spaces within the dwelling are shown for reference.
