

Save Houghton East

Championing the Houghton East Neighborhood Plan

A Committee of Volunteers committed to holding the City accountable for the promises made to the Houghton East Neighborhood Plan (aka HENP).

Dr. Roy Johnson	-	Retired Biology Professor / National Park Service Researcher & Scientist
Dan Porzio	-	Retired Developer & Construction Engineer
Tracy Scheinkman	-	Biologist & Owner/Builder custom homes
Sharon McCusker	-	Retired Civilian Employee w/ TPD
Linda Schaub	-	Retired Engineering Draftsman
Dr. Dave Robertson	-	Doctor
Kathleen Gale	-	Retired Paralegal
Steve Harrington	-	Concerned Tucsonan / Volunteer

Summary of Results as of 1-11-16:

Signatures in Protest (**Collection ongoing**): **Over 222**

- 93 Collected from feeder streets & Subdivisions in the immediate vicinity.
- 17 of the 19 residences that directly border the property within 300'.
- 112 collected from community opposing this from outside the "immediate vicinity".
- **0 signatures collected with conflict of interest.**

The difference between their signatures and ours is that we do not have a financial interest in protecting our neighborhoods from inappropriate development!

- We charge that the 80+ signatures submitted by the Gordley group and Pastor from the parishioners at the 22nd St. Baptist Church are illegal and demand that they be thrown out and stricken from the record due to conflict of interest as they will benefit directly from the sale of their property.

Letters of Opposition: 8 minimum

- Minimum of 8, but given the nearly 100 attendees of our neighborhood meetings, it will exceed that.
- Molly McKasson, one of the originators of the HENP, has promised to write Mr. Beal in her support of the ORIGINAL document and opposing any amendments to it.
- From Dr. Roy Johnson retired National Park Service Research Scientist & University Biology Professor.
- Linda Schaub has written 2 letters to Mr. Beall urging denial of the amendment to the HENP.
- Darla Sidles, with the United States Dept. of the Interior and Superintendent of the Saguaro National park, has written to Paul Cunningham in opposition of the development.
- Henri Carpentier has written at least 2 letters in opposition. His property lies within 300' of this development.

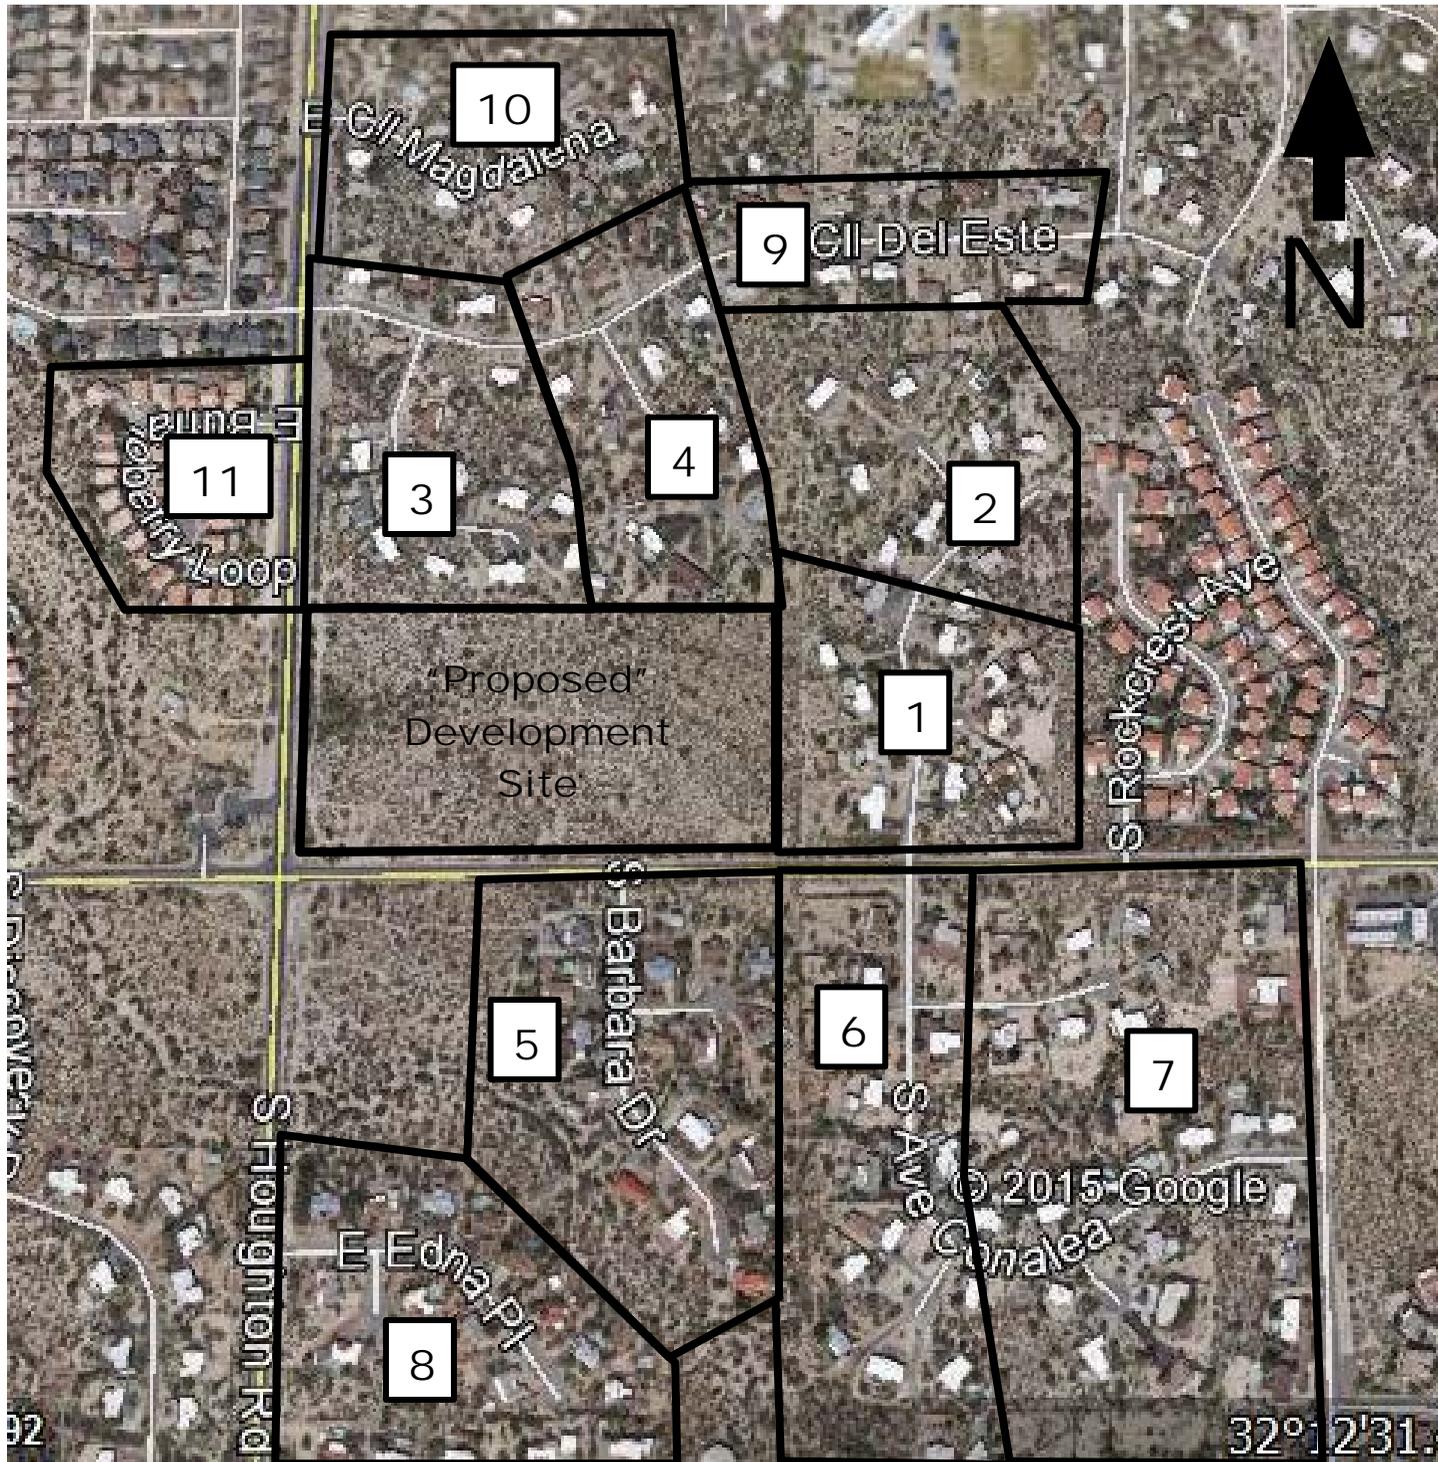

Additional letters of Opposition:

- Linda Schaub contacted Council member Cunningham & advocated against the project. His staff called & encouraged more information against the project.
- Committee members & neighbors have sent numerous letters of opposition to all the Councilman, Mayor, Supervisors and John Beall.

The majorities of those contacted, once factually and truthfully informed, were outraged and opposed the amendment of the Houghton East Neighborhood Plan or any subsequent re-zoning of the parcels involved.

Our canvassing revealed the following:

- The neighborhood residents are getting pressured to support the development from the Gordley Group hired by Brentwood Development through miss-leading statements.
- A recurring theme was uncovered that residents were asked if they would rather have a Fry's than an apartment complex, suggesting to us that a worst case scenario was interjected to produce fear in favor.
- The Gordley Group is taking Credit for lighting changes along the Houghton Corridor which is an EXTREME exaggeration of the truth.
- Residents were told that this was a "done deal".
- Residents were surprised & shocked when told "This is NOT a done deal".
- Residents were told that Fry's has "lost" their lease when in fact Fry's OWNS the building.
- Another resident told us that the "City" was out to his house and was told that permits were already approved.
- One resident was so harassed and intimidated by the Developer & Planning Ctr. that they sold their property.
- This resident was asked if she was feeling this service station being right up against her property, was the reason she would leave and sell out; Her response was, "IT CERTAINLY IS THE REASON!" The Planning Center then continued her presentation, going through the motions of explaining how things would proceed by Brentwood.
- The Developer & Planning Ctr. are being VERY disingenuous; using fear & intimidation as a tactic to gain favor and collecting signatures of support under false pretenses.
- There are concerns that Big Box stores & strip malls will be built on every intersection along a designated Scenic Corridor turning it into another Oracle Rd.
- Our active campaign has passed out fliers with talking points of facts & TRUTH, only!

TPC Project No. BDU-01
Plan Amendment Number: PA-15-02**

I/we the undersigned property owners, wish to

PROTEST amending of the HENP & any proposed rezoning attempts.

Reason: We the undersigned oppose any attempt to amend the HENP plan or re-zoning request. The following are just a few of the reasons: **1)** The heat island effect from 10 acres of asphalt will create 200,000 kw's of heat, rising 650' and radiating out 2 miles in every direction. **2)** Rain runoff from said 10 acres = 250,000 gallons of water. **3)** It will obliterate one of the last remaining open spaces destroying open space, wildlife habitat, wildlife corridor & riparian washes. **4)** Being a low density area, we cannot sustain the 5 grocery stores that currently exist. Northeast Tucson already suffers from an almost 12% vacancy rate. The proposed big box store is likely to fail and become yet another blighted empty building less than a mile from two other failed grocery stores. **5)** The HENP plan was written and adopted for the sole purpose of protecting this area. **6)** We are concerned about increased crime, traffic, light pollution and noise that occur in proximity to big box stores. **7)** The proposed Strip landscaping does not constitute "open space". **8)** Three-quarters of a mile to the South exists a 60 acre PAD development with plans for a 123,000 sf anchor store that has already been re-zoned that Fry's could easily use. **9)** The neighborhood is in the geographic position of providing a transition from a major roadway on the west (Houghton Rd.) to the Saguaro National Park which brings in over 40 million dollars a year from visitors around the world and is a National treasure that needs to be protected. **10)** Property values are currently being negatively affected by this proposed project and are anticipated to get worse. **11)** The residents of the Houghton East Neighborhood agreed to be annexed into the City limits in exchange for the promises made by the City in the HENP. **12) 12)** Houghton Rd. is a designated Scenic Corridor and as stewards of the HENP plan, we intend to try and keep that way. Commercial development of big box stores anywhere along Houghton in the transition zone will not only be a blight but will decimate the fragile ecosystem. **13)** Once bladed, the beauty of this area cannot be replaced.

I/we the undersigned property owners, wish to

PROTEST amending the HENP & any rezoning of the HENP area.

Reason: We the undersigned oppose any attempt to amend the HENP plan or re-zoning request. The following are just a few of the reasons: **1)** The heat island effect from 10 acres of asphalt will create 200,000 kw's of heat, rising 650' and radiating out 2 miles in every direction. **2)** Rain runoff from said 10 acres = 250,000 gallons of water. **3)** It will obliterate one of the last remaining open spaces destroying open space, wildlife habitat, wildlife corridor & riparian washes. **4)** Being a low density area, we cannot sustain the 5 grocery stores that currently exist. Northeast Tucson already suffers from an almost 12% vacancy rate. The proposed big box store is likely to fail and become yet another blighted empty building less than a mile from two other failed grocery stores. **5)** The HENP plan was written and adopted for the sole purpose of protecting this area. **6)** We are concerned about increased crime, traffic, light pollution and noise that occur in proximity to big box stores. **7)** The proposed Strip landscaping does not constitute "open space". **8)** Three-quarters of a mile to the South exists a 60 acre PAD development with plans for a 123,000 sf anchor store that has already been re-zoned that Fry's could easily use. **9)** The neighborhood is in the geographic position of providing a transition from a major roadway on the west (Houghton Rd.) to the Saguaro National Park which brings in over 40 million dollars a year from visitors around the world and is a National treasure that needs to be protected. **10)** Property values are currently being negatively affected by this proposed project and are anticipated to get worse. **11)** The residents of the Houghton East Neighborhood agreed to be annexed into the City limits in exchange for the promises made by the City in the HENP. **12)** Houghton Rd. is a designated Scenic Corridor and as stewards of the HENP plan, we intend to try and keep that way. Commercial development of big box stores anywhere along Houghton in the transition zone will not only be a blight but will decimate the fragile ecosystem. **13)** Once bladed, the beauty of this area cannot be replaced.

Approvals and Protests must have an owner's signature to be recorded.

**If protests are filed from property owners representing 20% or more by area in any quadrant of the area located
Within a 300 foot radius of the parcel(s) on which the rezoning is proposed, an affirmative vote of ¾ of the
Mayor and Council will be required to approve the rezoning ordinance.**

Subject : Houghton/22nd Plan Amendment, T15PRE0011
Tax Parcels: 133-38-008f & 133-38-008J
TPC Project No. BDU-01
Plan Amendment Number: PA-15-02

I/we the undersigned property owners, wish to

PROTEST amending the HENP & any rezoning of the HENP area.

Reason: We the undersigned oppose any attempt to amend the HENP plan or re-zoning request. The following are just a few of the reasons: **1)** The heat island effect from 10 acres of asphalt will create 200,000 kw's of heat, rising 650' and radiating out 2 miles in every direction. **2)** Rain runoff from said 10 acres = 250,000 gallons of water. **3)** It will obliterate one of the last remaining open spaces destroying open space, wildlife habitat, wildlife corridor & riparian washes. **4)** Being a low density area, we cannot sustain the 5 grocery stores that currently exist. Northeast Tucson already suffers from an almost 12% vacancy rate. The proposed big box store is likely to fail and become yet another blighted empty building less than a mile from two other failed grocery stores. **5)** The HENP plan was written and adopted for the sole purpose of protecting this area. **6)** We are concerned about increased crime, traffic, light pollution and noise that occur in proximity to big box stores. **7)** The proposed Strip landscaping does not constitute "open space". **8)** Three-quarters of a mile to the South exists a 60 acre PAD development with plans for a 123,000 sf anchor store that has already been re-zoned that Fry's could easily use. **9)** The neighborhood is in the geographic position of providing a transition from a major roadway on the west (Houghton Rd.) to the Saguaro National Park which brings in over 40 million dollars a year from visitors around the world and is a National treasure that needs to be protected. **10)** Property values are currently being negatively affected by this proposed project and are anticipated to get worse. **11)** The residents of the Houghton East Neighborhood agreed to be annexed into the City limits in exchange for the promises made by the City in the HENP. **12)** Houghton Rd. is a designated Scenic Corridor and as stewards of the HENP plan, we intend to try and keep that way. Commercial development of big box stores anywhere along Houghton in the transition zone will not only be a blight but will decimate the fragile ecosystem. **13)** Once bladed, the beauty of this area cannot be replaced.
