

REBATE FOR INSTALLATION OF A RESIDENTIAL GRAY WATER IRRIGATION SYSTEM

Did you know that 1/3 of typical household wastewater can be re-used as gray water for landscape plants?

Gray water is wastewater that is collected from the drains of hand-washing sinks, showers, bathtubs and clothes washing machines. This water can be used to irrigate fruit trees, landscapes and lawns.

Tucson Water's Single Family Residential Gray Water Rebate Program can reimburse you up to \$200 when a permanent gray water irrigation system is installed in your home.

Get more information on gray water:

- (520) 791-4331

Only gray water irrigation systems purchased after January 1, 2011, qualify for a rebate. Tucson Water customers must also attend a 2-hour gray water workshop that will cover the appropriate methods to design, operate and maintain a gray water system.
