COMMENT / QUESTION:

IID needs to be changed. It has lead to uneven development. The overlap is being used by developers to target the downtown district, as a result other areas such as North stone & South 6th have been ignored. Also community voice has been lost as only one presentation is required and at times, this has been ignored. — Borrio Vase - "Flash TV" project

COMMENT / QUESTION: The IID must truly promote actual transit-oriented development, and the most effective way to do that is to create a system whereby multifamily housing and employers can provide a deeply discounted all-access transit pass to 100% of their tenants/employees and this could be made a condition of relief from high parking requirements, IE, eliminate parking minimums + require buy-in to our transit system by developers. =>

For more space, please use other side.

This will help to ~~build~~ build (a) demand for more frequent transit in the core and (b) a stronger level of constituent support for building a system that works better for all.

This is a way to offset "gentrification" effects and promote equity, as well as to mitigate the traffic/infrastructure impacts of downtown development.

COMMENT / QUESTION: These should NEVER be sunsetted as long as Prop 207 is on the books. Overlays create a 2-class society - Those ^{few} who get to maximize the use of their property and the rest of us, who get to deal with the consequences.
