SOBRIETY CHECKPOINT FRIDAY, MAY 11, 2012

*****UPDATE – MAY 15, 2012*****

On Friday, May 11th, 2012, the Tucson Police Department conducted a sobriety checkpoint on West Grant Road at North Fairview Avenue. The intent of the checkpoint was to increase the awareness of motorists about the dangers of impaired driving, to deter those who may be impaired from driving, and to detect and investigate DUI offenses at the checkpoint.

The sobriety checkpoint utilized a total of 19 officers, who contacted approximately 1,116 drivers during the hours of operation (9:30 p.m. – 4:00 a.m.). During this deployment, officers made 15 Misdemeanor DUI arrests and 2 Felony DUI arrests, three of which were for persons under 21 years of age. One of the 15 Misdemeanor DUI arrests was also charged with Extreme DUI for having an alcohol concentration above 0.150 BAC. The average BAC for all of the DUI arrests was 0.119 BAC. In addition to the DUI related arrests, officers issued 53 other citations, contacted 35 Designated Drivers, and impounded 4 vehicles.

Sobriety checkpoints and saturation patrols are proven and effective methods of deterring impaired driving and are important components of the Tucson Police Department's overall efforts to reduce impaired driving. Surveys from prior sobriety checkpoints indicate overwhelming public support for checkpoints as a strategy to reduce DUI offenses. The Tucson Police Department encourages drivers to not drink and drive.

Sergeant Chris Andreacola – May 15, 2012

The Tucson Police Department was recently awarded a grant from the Governor's Office of Highway Safety for the purpose of conducting sobriety checkpoints over the upcoming summer months. Our next sobriety checkpoint will be conducted during the evening hours on Friday, May 11, 2012. The checkpoint will be conducted within the city limits of Tucson and in an area that historically has had a high number of DUI related collisions.

Our goal is to reduce the number of collisions that involve impaired drivers and to lower the injuries and deaths associated with these types of collisions. By conducting the checkpoint, we will be able to increase the awareness of motorists
