

Houghton Road: Irvington Road to Valencia Road Public Meeting; Wednesday, Aug. 26, 2009 Desert Sky Middle School Comment Summary			
Are there any specific areas where you would like to offer suggestions or ideas?	What do you like most about both the public process for this project and tonight's presentation with question-and-answer format?	What do you like least about both the public process and tonight's presentation with question-and-answer format?	General comments
Comments Received at the Public Meeting			
	Very informative. Thanks!		
Add Jojoba to the landscaping selection.	Our questions from the audience were addressed.		I have changed my opinion from being concerned about the noise factor of added traffic lanes to being reassured that the rubberized asphalt will result in less noisy traffic.
Having metal power poles right next to Houghton Road is a safety concern. Have concerns regarding greenway walk - County seems to be dragging its heels. Need to listen to residents locally.			Need to get Ray Carroll, Supervisor, District Four, involved on walkway. Have concerns about walking on east and six-plus lanes where houses are located on both sides such as at Rita Road and Houghton Road. Otherwise may have to shrink road or median.
Comments Received During the Two-Week Comment Period Ending Sept. 9, 2014			
Your meeting was very informative.	Individual displays; handling of the questions was quick and thorough.	The volume of the public address system was too low.	
	Thank you for making it available online. Staff was helpful. Displays were very helpful. Engineer was thorough in answering questions.	I was unable to attend the presentation.	I am glad the project is underway; I am concerned that the rubberized road will not be enough noise abatement for those living along the corridor.
