**Subject:** Re: Comments on Broadway

Dear Mr. Ford,

I was informed by our Information Technology department that there are more serious issues with our web site than I thought. The City's web software is having technical issues that are affecting TDOT's web site. It may take some time before the issues are fixed, however.

I apologize for the inconvenience. If you have any questions about the project, or desire information not available currently online, please let me know.

Respectfully,  
~Jenn

Why is the City's Broadway Corridor page not updated for future meeting times? It has August 30th as last public meeting and no currently scheduled meeting.
