

22nd Street Improvements - Interstate 10 to Tucson Boulevard PROJECT FACT SHEET

The 22nd Street Corridor Improvements from Interstate 10 (I-10) to Tucson Boulevard will add one new travel lane in each direction, bridges over the railroad tracks, and intersection improvements along 22nd Street to promote mobility, capacity, and safety. It will create new roadway and streetscape designs, guide future land use decisions, enhance environmental and economic sustainability, and improve mobility for vehicles, transit, bicycles, and pedestrians. Special consideration will also be given to ADA accessibility.

The study and design of 22nd Street, from I-10 to Tucson Boulevard, is occurring in two sections:

- 1) The planning for the Kino Parkway/22nd Street Interchange and the widening of 22nd Street, from Kino Parkway east to Tucson Boulevard, have been underway for more than a year. The City has established a Citizens Advisory Committee representing neighborhoods, businesses, and property owners that meets regularly for this planning and design effort.
- 2) 22nd Street, from I-10 to Kino Parkway - Phase Two, is just getting underway with the selection and formation of the Citizens Oversight Committee (COC). This committee will include representatives from neighborhoods, businesses, and property owners who will help guide decisions about urban and transportation planning, land use, and connectivity. Phase Two will include evaluating and defining the conditions of the Corridor within the study area, developing conceptual alternative alignments, and recommending a preferred alignment.

The planning and design for this Corridor is expected to be completed by 2010. The construction is currently planned for the second and third periods of the RTA regional transportation plan (2012-2021).

This is a project of the Regional Transportation Authority. The voter-approved, \$2.1 billion RTA plan will be implemented through 2026. Details about the full plan are available at www.RTAmobility.com. The Regional Transportation Authority has a nine-member board with representatives from local, state and tribal governments. This project will be managed by the City of Tucson.
