MainStreet

MainStreet is a regional small business assistance program focused on minimizing the construction impact on businesses located along RTA roadway projects.

All businesses located within a quarter mile of RTA-funded transportation projects are eligible for services.

This service is FREE to the construction project area businesses.

MainStreet provides:

- Construction project information and communication to area businesses before and during construction
- A point-of-contact (ombudsman) for business issues related to the project
- Confidential business consulting services that assist in strengthening and growing your company

Together we can help turn the challenges of road construction into business opportunities!
