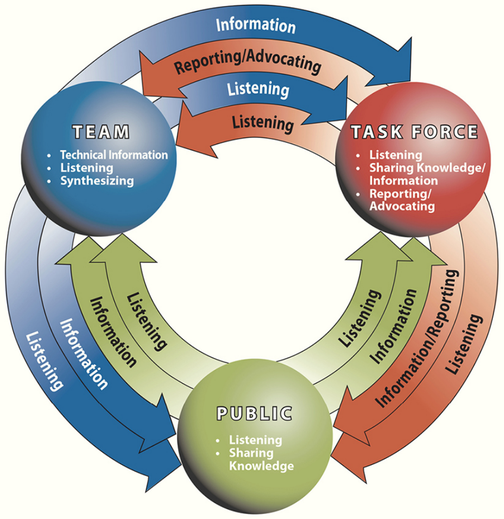
Planning & Design Phase: Key Input & Decision Points in the Public Participation Process

BROADWAY BOULEVARD
EUCLID to COUNTRY CLUB



The Broadway Project's Planning and Design Phase provides the most opportunity for the public to inform and shape the resulting improvements. The project technical team has developed a process for the project that will be guided by Context Sensitive Solutions approach and the International Association of Public Participation (IAP2) 'collaborate' level of public participation, and will incorporate applicable recommendations from the U.S. Environmental Protection Agency's Guide to Sustainable Transportation Performance Measures.

The diagram below represents the technical tasks that must be accomplished to develop the Design Concept Report and Initial Plans. The Citizens Task Force meetings and the Public Meetings will allow presentation of technical information and the gathering of public input, which can then be utilized in the design process. The Agency Reviews will keep the sponsoring agencies involved in the development of the design, and ensure that the project is "on the right track." The Mayor and Council meetings will provide action and direction on the resulting Design Concept Report.
