

**Houghton Road: Irvington Road to Valencia Road
Public Meeting; Tuesday, April 13, 2010
Rincon Vista Middle School
Comment Transcription**

General Comments	Attended Previous Meetings for This Project
Comments Received at the Public Meeting	
I am pleasantly surprised at the detail and skill of this long range planning. It is a shame the session was so poorly attended.	Yes
Very well thought out — preserves trees and power lines. Professionally planned. Would like to see faster completion.	No
Nice job on presentation graphics. Makes things clearer. It's hard to see the vegetation destroyed, please try to recycle, save and add to existing undergrowth where possible. Natural waves of wildflowers would be nice. Be respectful of art work, one snake might be enough. This project isolates us with no other access except through construction — to be considered.	Yes (2)
	No
There are 98 houses where Keystone Ave. is the only street available from the meeting of that street at Houghton as it exists, for those of us in that Saguaro Canyon Homeowners to get on to Houghton. Will there be a stoplight there? 98 houses x 2, 3 or 4 drivers per household. Please don't plant sage. Thank you.	Yes
Once funding is available for brown water pipes to be put in from Irvington to Valencia, after the widening is done, will the "new" road have to be torn up? Need tables so can sit and write comments. Only place tonight was lap or chair. Should switch granite path with multiuse for safety. Unless you are skilled horse person you won't use granite for walking horse. At bus pullouts will there be places to sit even though the buses will not be on Houghton? Could be part of Art!	Yes
Staff and information provided were extremely helpful. The project is well thought out and a great effort to include public input is appreciated. We look forward to the finished product.	No
A stop light at Poorman and Houghton is crucial!	Yes!
Plan looks good. Especially like the inclusion of good bike paths and art work.	Yes
This was a well-organized meeting, speakers were well-informed and displays were quite informative.
