*** ADDENDUM TO NOTICE OF DECISION ***

Effective: October 8, 2020

Case Number: RNA-DRB-20-01
Activity Number: T20SA00145
Review Type: Rio Nuevo Area (RNA)
Project Name: Farhang & Medcoff
Location: 100 South Church Avenue, Tax Parcel # 117-20-016H

This is an addendum to the approval notice issued on June 1, 2020, for the administrative professional offices at 100 South Church Avenue. The site is currently zoned OCR-2 office, commercial, and residential, and is located within the Rio Nuevo Area (RNA) overlay zone. The structure is not listed as, or eligible to be historic and is not on a designated or pending National Register.

Modification Request by the Applicant:

Ms. Grace Schau, Project Designer for a.23 Studios, on behalf of the property owner, has requested the following modifications to the approved design:

- 1) Maintain the previous land use on the property as professional and administrative offices. The original space on the ground floor that was planned for retail it is now planned for a conference room and storage for occupants, since adjacent property owner did not agree with the ADA access ramp to the entrance of the new retail space, making it now unfeasible;
- 2) Remove storefront entrance, ground floor windows, and accessible ramp and handrail on the south elevation. Main office entrance will remain;
- 3) Remove two windows on the ground floor of the east elevation;
- 4) Remove perforated metal panel at windows on ground floor east elevation; and
- 5) Steel façade to terminate even with the top of the parapet on the north and east elevations.

Design Review:

The Design Review Board (DRB) reviewed the proposed modifications on October 2, 2020 for compliance with RNA design standards pursuant to Unified Development Code (UDC) Section 5.12.7, and recommended approval.

Planning and Development Services (PDS) Director's Decision:

Pursuant to provisions of the RNA design criteria, as listed by UDC Section 5.12.7, the applicant's modification request stated above is approved, as shown on the submitted plans stamped approved on October 8, 2020.

This addendum applies only to the project's compliance with the Rio Nuevo Area (RNA), and does not constitute approval of a building permit or an approvable development plan package. Compliance with all other applicable zoning and building code regulations is required. Changes made to the plan in order to achieve compliance with these other code requirements may require another review for compliance with the DRB.

This addendum to the notice of decision must be included with all future submittals associated with this project. For any questions regarding this addendum, please contact María Gayosso: specialdistricts@tucsonaz.gov, (520) 837-6972.

Introduction

The WDGE1 LED family is designed to meet specifier's every wall-mounted lighting need in a widely accepted shape that blends with any architecture. The clean rectilinear design comes in four sizes with lumen packages ranging from 1,200 to 25,000 lumens, providing true site-wide solution.

WDGE1 delivers up to 2,000 lumens with a soft, non-pixelated light source, creating a visually comfortable environment. The compact size of WDGE1, with its integrated emergency battery backup option, makes it an ideal over-the-door wall-mounted lighting solution.
