

SECTION 802

LANDSCAPE GRADING

802-1 DESCRIPTION

The work under this section shall consist of grading, contouring, smoothing or otherwise shaping and compacting, **landscape areas or other finish graded areas** designated on the project plans.

802-2 MATERIALS (None Specified)

802-3 CONSTRUCTION DETAILS

Roadway shoulders, **areas behind curb, between curb and sidewalk, between curb and multi-use paths and behind sidewalks and multi-use paths,** and soil areas left exposed after seeding, planting or prior to placement of decomposed granite shall be graded as required to leave a smooth appearance conforming to the general shape and cross section indicated on the project plans **or as directed by the Engineer.** The final surfaces shall be raked. All objectionable material, trash, brush, weeds, and stones larger than 2 inches in diameter shall be removed from the site and disposed of in a manner acceptable to the Engineer.

802-4 METHOD OF MEASUREMENT

Landscape grading will be measured either by the square yard of area actually graded or as a single complete unit of work.

802-5 BASIS OF PAYMENT

The accepted quantities of landscape grading, measured as provided above, will be paid for at the contract unit price per square yard or at the contract lump sum price specified in the bidding schedule.

When landscape grading is not included as a contract item, full compensation for any landscape grading necessary to perform the construction operations specified on the project plans and the Special Provisions will be considered as **incidental to and included in the** other contract items in the bidding schedule.
