

# MITCHELL PARK IMPROVEMENTS 2025

## PARK IMPROVEMENTS

The proposed park improvements respond directly to site-specific challenges identified through community feedback and collaboration with Parks and Recreation staff. Enhancements include the addition of a small steel shade ramada over an existing picnic table, passive rainwater harvesting basins featuring pollinator-friendly trees and shrubs, and the addition of woody mulch under all existing trees to improve tree health and reduce dust. Additional deep water irrigation to existing trees will further support the tree health. Natural walking pathways throughout the water harvesting area with native, pollinator-friendly plants will invite users to enjoy this well-loved neighborhood park.

**A** Natural soil pathway between basins

**B** Water harvesting basin with mulch and native pollinator plants

**C** Ocotillo ramada with red roof and rust accents

# TREES & PLANT PALETTE

## DESERT TREES

Desert Willow  
*Chilopsis linearis*

Ironwood  
*Olneya tesota*

Mesquite  
*Prosopis velutina*

## ACCENTS

Ocotillo  
*Fouquieria splendens*

Saguaro Cactus  
*Carnegiea gigantea*

Barrel Cactus  
*Ferocactus spp.*

## MIDDLE STORY

Desert Milkweed  
*Asclepias subulata*

Jojoba  
*Simmondsia chinensis*

Desert Spoon  
*Dasyilirion wheeleri*

## UNDER STORY

Globemallow  
*Sphaeralcea ambigua*

Fairy Duster  
*Calliandra eriophylla*

Desert Sage  
*Salvia dorrii*

Desert Marigold  
*Baileya multiradiata*

Grama Grass  
*Bouteloua spp.*

Desert Honeysuckle  
*Anisacanthus thurberi*
