

GRANT ROAD

UNION PACIFIC RAILROAD UNDERPASS PROJECT

OVERVIEW

This voter-approved Regional Transportation Authority (RTA) project offers a cost-efficient approach to improving traffic congestion on Grant Road under the Union Pacific Railroad (UPRR) bridge and Interstate 10 (I-10) overpass, between Fairview Avenue and the eastbound I-10 frontage Road. The current design maintains the existing walls and sidewalk, plus narrows the median to expand to six traffic lanes and increase I-10 turn lane access. Design is scheduled to be completed in 2026, and construction will follow thereafter.

IMPROVEMENTS

- Expand to 6 lanes of traffic east of I-10 and under the UPRR
- Increase I-10 turn lane access
- Extend sidewalks within project limits
- Traffic signal & crosswalk improvements
- ADA enhancements
- Drainage upgrades
