## Department of Transportation

### Mobile Storage Permitting Requirement

When a refuse collector or mobile storage unit is placed on City of Tucson rights-of-way a City of Tucson Traffic Control Permit is required. City of Tucson right-of-way typically consists of the roadway, sidewalk easement (paved or unpaved) and alley (where access to alleyway is restricted). The permit fee is \$75.00 per 30 consecutive days. A traffic control plan will be required when placing a unit on a lane in the Downtown area.

Placing refuse collectors and mobile storage units may require reserving a Loading Zone and/or needing to Hood Parking Meters in the Downtown, 4<sup>th</sup> Avenue, and/or the University areas for an additional fee. Contact Park Tucson at 791-5071.

Refuse collectors and mobile storage units are considered hazards when placed in roadway and require a Type II barricade with a Type 'A' flasher at each end of unit that faces traffic. (Any local barricade company can assist with traffic control rental needs.)

(Example of Type II barricade with Type 'A' flasher)

Units placed on City of Tucson right-of-way without a permit and traffic control could be subject to fines. If there are any specific questions please email them to [tdotpermitcenter@tucsonaz.gov](mailto:tdotpermitcenter@tucsonaz.gov) or contact Engineering at 520-791-5100.
