TRAFFIC ALERT

MOUNTAIN AVENUE ROGER ROAD TO FORT LOWELL ROAD PAVING AND DRAINAGE IMPROVEMENT PROJECT

This is a continuing series of construction alerts that will be issued throughout the construction of the Mountain Avenue – Roger Road to Fort Lowell Improvement Project. These alerts will announce construction, detour and closure information as it affects traffic. Motorists, bicyclists and pedestrians are asked to obey all posted speed limit signs within the construction area and be alert for construction crews and personnel working in the area.

Limberlost Road at Mountain Avenue will reopen to travel on Wednesday, November 26, 2008. Limberlost had been closed at Mountain Avenue to allow work crews to make underground utility modifications to water lines, reclaimed water lines, and the sanitary sewer system.

On Monday, December 1, 2008, beginning at 7 a.m., underground utility modifications to water lines and sewer lines will require travel restrictions on Roger Road at Mountain Avenue.

- **Eastbound and westbound Roger Road will be closed to all traffic at Mountain Avenue. This closure is expected to be in place until Friday, December 12, 2008.**

Electronic message boards are in place along Campbell Avenue and on First Avenue to advise motorists of the upcoming intersection closure. Motorists and bicyclists are advised to find alternate routes to avoid delays.

The improvement project began in October 2008 is being constructed by Borderland Construction, which is under contract with the City of Tucson Department of Transportation. The project consists of the removal, reconstruction, and widening of the existing two-lane street to provide two through lanes, bike lanes, curb, sidewalk, street lights at various intersections, and landscaping.

This \$11 million, two-year-long project, will also include underground storm drain improvements and the relocation of a majority of the overhead utility lines to underground. Modifications to water and sanitary sewer facilities will also be made as part of this project.

Work hours for the project will be Monday through Friday, from 7 a.m. to 5 p.m. Please note that the above schedule is subject to change due to inclement weather and/or equipment malfunction.
