

# Tanque Verde Road and Sabino Canyon Road Intersection

## Fact Sheet August 2012

### Project Overview

**Sabino Canyon Road:** The southbound approach to the intersection will be reconfigured to have two through lanes, two right-turn lanes and two left-turn lanes. The northbound approach will be rebuilt with two left-turn lanes, two through lanes and one right-turn lane. Improvements will start approximately 1,500 feet north of Tanque Verde Road and extend to approximately 1,000 feet south of Tanque Verde Road.

**Tanque Verde Road:** The eastbound approach to the intersection will have three through lanes and two left-turn lanes. The westbound approach will have three through lanes, one right-turn lane and one left-turn lane. The improvements will extend from 1,000 feet east to 200 feet west of the intersection.

Other work includes improving drainage, relocating the existing bus layover station to about 500 feet south of its current location on Sabino Canyon Road and providing bicycle and pedestrian accommodations on the east side of Sabino Canyon Road.

These improvements are funded through the Regional Transportation Authority (RTA). Utility relocation work began in July 2011, and construction is expected to be completed in August 2012.

### Public Involvement

Throughout the course of the project, there have been ongoing meetings with the public, a community-based Task Force, area businesses, nearby residents and neighborhood/homeowners' associations. Input at these meetings has contributed to several design and construction considerations and modifications.
