Traffic Lane Restriction on 12th Ave., North of Irvington, Mar. 28-30

The northbound curb lane of 12th Ave. from Oklahoma St. to approximately Michigan St. will be closed to traffic from 6 a.m. to 7 p.m., on Monday, March 28, while Tucson Water crews perform a pump test on a nearby well.

The lane will close again from 7 a.m., Tuesday, March 29, to approximately noon, Wednesday, March 30, when Tucson Water crews conduct an aquifer test. The restricted roadway area is six blocks, north of Irvington Rd., and includes a Sun Tran bus shelter stop.

The pump and aquifer tests are part of the replacement of a well that is used in groundwater cleanup near 12th Ave. and Oklahoma St. The tests determine how much water can be produced from the replacement well and the size of the pump that will be installed.

Any water discharged will first be processed through an air-stripping tower onsite to remove contaminants.

Motorists in the area are asked to exercise additional caution in the area for worker safety and be prepared for traffic delays.
