The project is expected to take four weeks. Updates will be sent for traffic conditions as work progresses.

A 30" water valve and a 20" water valve are being replaced. Roadway areas will be excavated for crews to reach the valves and assess what is needed. Steel plates will be temporarily installed to allow traffic in all lanes when the valve replacements are not taking place. There will be no interruption of water service to customers.

Motorists should be prepared for traffic delays and plan accordingly. If driving in the vicinity, please exercise additional caution to help ensure the safety of the workers.
