12” Water Main Break Disrupts Traffic at Swan and Camp Lowell

(4/24/13 @ 5 PM) A 12-inch water main break has caused major traffic disruptions at the intersection of Swan Road and Camp Lowell Drive. Motorists are asked to avoid the area completely for the next 4-6 hours.

The following restrictions are in place:

Southbound Swan from Camp Lowell to Fort Lowell Rd. is closed.

Southbound Swan traffic is diverted west or east onto Camp Lowell.

Northbound Swan traffic may not turn west onto Camp Lowell.

Eastbound traffic on Camp Lowell is being diverted to Old Fort Lowell Road.

The water main break is in the intersection of Swan and Camp Lowell. The damage was caused by a contractor working in the area.

Water service was restored to nearby residences and businesses shortly after the break. Once repairs are complete, Tucson Water plans to flush water lines in adjacent neighborhoods to remove any dirt particles that may have entered the lines as a result of the break. Please avoid the area completely, if possible.
