Tucson Water and Arizona Project WET Create a Unique Tour Experience Using Smart Devices

Tucson Water and Arizona Project WET have partnered to provide a series of self-guided tours at the Sweetwater Wetlands. The new Discovery Program engages visitors in explorations that lead them on a journey along the path that surrounds the settling ponds and recharge basins.

Please join us at 10:30 a.m., Thursday, April 30, at the Sweetwater Wetlands, 2551 W. Sweetwater Dr., to celebrate the launch of the Discovery Program. A group of Amphitheater district students will demonstrate the tour, which is currently open to the public.

Discovery Program Journeys start at the main kiosk. Guests can use a QR code reader app on any smart device to view the Wetlands in a scientific way as they navigate around the 60-acre site.

There are Botany, Hydrology, Ornithology, and Wildlife Biology Journeys available. The Hydrology Journey was developed in collaboration with Tucson Water hydrologists Dick Thompson and Margaret Snyder. It illustrates the surface water-groundwater connection and how water is managed in Tucson.
