March 5, 2013, update
Tucson Water Meter Reading, Tucson, Arizona
page one

(above) Meter Reader David Romo demonstrates the meter reading process for IBM Team Members. Metering Services employees read 225,000 meter on a monthly basis.

**IBM's Smarter Cities Challenge Grant - March 5, 2013, update - page two
Tucson Water Meter Reading, Tucson, Arizona**

(above) Metering Services employees David Romo and Adrian Gonzalez (right) demonstrate the hand-held Meter Reading unit used to collect water meter data. Data collected in this unit is downloaded daily to prepare monthly water billings.

(above) Metering Service Employee David Romo demonstrates meter reading data entry on a hand held device. Meter readings are collected daily along individual routes and downloaded daily for bill processing.

IBM's Smarter Cities Challenge Grant
March 5, 2013, update
Tucson Water Meter Reading, Tucson, Arizona
page three

(above) IBM Team members gather around Metering Services employee David Romo as he demonstrates the technique for manually collecting a meter reading from a meter box. Metering Services employees collect 2.7 million meter readings annually.
