

A proud part of the City of Tucson

Sidewalk Removal and Replacement Scheduled for Portion of Sweetwater Wetlands

The City of Tucson has contracted with Sunland Asphalt to remove and replace portions of the sidewalk at the Sweetwater Wetlands.

The work will begin on Monday, July 15, and is estimated to be completed on Friday, July 26, weather permitting.

Access to Sweetwater Wetlands will be maintained during this project. Traffic control barricades will be placed around the work site where concrete is being removed and poured.

For safety reasons, visitors to the wetlands are asked to keep clear of the work area and use alternate routes to enjoy the wildlife and scenery. Please keep children away from the barricades and concrete work.

If you have any questions about this project, call Maya Teyechea, Project Manager, at (520) 837-2232.
