

WATER PLAN: 2000-2050

TABLE OF CONTENTS

	Page
List of Acronyms	v
Chapter One: Introduction	1-1
Geographic Setting	1-1
The Planning Goals	1-3
The Planning Process	1-4
Contents of the Report	1-5
Chapter Two: A Community Creates a Demand	2-1
Prior to 1880: Life Along the Santa Cruz River	2-2
Post-1880 to World War II: A Lessening Stream	2-2
World War II to 2000: The Community Expands	2-4
Planning for a Sustainable Future	2-9
Chapter Three: Projections of Population and Water Demand	3-1
Long-Range Planning Area	3-1
Projections of Population	3-3
Per Capita Water Usage Rates	3-6
Projections of Total Water Demand	3-7
External Factors That Can Affect Future Demand	3-9
Demand Management	3-10
The Role of Projected Demand in Water Planning	3-12
Chapter Four: Available Water Resources	4-1
The Assured Water Supply Program	4-2
Ground Water	4-3
Colorado River Water	4-6
Effluent	4-13
Summary	4-15

	Page
Chapter Five: Water Delivery Systems	5-1
Existing Water Systems	5-1
Identifying Potable and Reclaimed System Needs	5-8
Putting the Planning Pieces Together	5-10
Chapter Six: The Planning Process	6-1
Integrated Resource-Planning Components	6-1
Plan Development Process	6-3
Scenario Planning for <i>Water Plan: 2000-2050</i>	6-4
Combining the Scenario Planning Assessments	6-8
Pathways to 2050	6-11
Chapter Seven: The Recommended Plan	7-1
Common Elements and Critical Decisions	7-2
Plan Recommendations	7-10
Costs	7-15
Summary	7-18
Chapter Eight: Future Issues and Challenges	8-1
Legal/Regulatory Issues	8-2
Public Acceptance of Renewable Sources of Supply	8-4
Resource Management Issues	8-5
Jurisdictional Issues	8-7
Beyond 2050	8-9
References	9-1
Glossary	10-1
List of Tables	
3-1. Population Counts and Projections for <i>Water Plan: 2000-2050</i>	3-3
3-2. Comparison of Single-Family Residential Water Usage	3-10
4-1. Central Arizona Project Allocations in the Tucson AMA (Acre-Feet)	4-7
4-2. Local Effluent Entitlements in 2003	4-13
5-1. Projected Potable System Expansion Costs in 2030 and 2050 (current dollars)	5-10
6-1. Pathways to 2050 – Schedule of Projects	6-13
6-2. Ratings of Pathways to 2050	6-15
7-1. Cost Comparisons	7-16
7-2. Meeting the Planning Goals	7-18

List of Figures

1-1.	Map of the Greater Tucson Area	1-2
1-2.	Plan Development Sequence	1-4
2-1.	Boundary of the Tucson Active Management Area	2-6
2-2.	Historical Water Use in the Tucson AMA by Sector: 1941-2000	2-7
2-3.	Total Water Production by Municipal Water Providers in the Tucson AMA in 2000	2-9
3-1.	Long-Range Planning Area	3-2
3-2.	Population Projections from 2000 to 2050	3-4
3-3.	Tucson Water Service Area Population Distribution in 2000	3-5
3-4.	Tucson Water Service Area Population Distribution in 2030	3-5
3-5.	Tucson Water's Projected Total Annual Water Demand from 2000-2050	3-7
3-6.	Annual Potable Water Demand for Tucson Water's Service Area, 2000	3-8
3-7.	Annual Projected Potable Water Demand for Tucson Water's Service Area, 2030	3-8
4-1.	The Central Arizona Project Aqueduct	4-7
4-2.	Existing and Proposed Clearwater Program Facilities	4-9
4-3.	Projected Demand and Available Sustainable Water Resources, 2000-2050	4-16
5-1.	Tucson Water's Well Fields	5-2
5-2.	Tucson Water's Potable Distribution System as of 2000	5-3
5-3.	Tucson Water's Reclaimed Distribution Pipeline System in 2000	5-6
5-4.	Sources of Supply to the Reclaimed Water System	5-7
5-5.	Potential Expansions of Tucson Water's Potable System through 2050	5-9
6-1.	The One-Dimensional Planning Approach	6-3
6-2.	The Scenario Planning Approach	6-4
6-3.	The Four Scenario Planning Futures Developed for the Clearwater Program	6-5
6-4.	Clearwater Program Common Elements and Pathways	6-6
6-5.	The Eight Scenario Planning Futures Developed for Possible Effluent Reuse	6-7
6-6.	The Sets of Common Elements for Effluent Reuse	6-8
6-7.	The Families of Futures	6-9
6-8.	Pathways to the Families of Futures	6-12
7-1.	Projected Total Demand and Use of Resources for the Recommended Plan	7-19
