To ensure your tap water is safe, clean and secure, Tucson Water conducts approximately 14,500 individual tests each year on the water in the main distribution system – before it reaches your home. Test results for key parameters are reported by 10 water quality zones for a water distribution system that covers some 375 square miles.

### TOTAL COLIFORM & E. COLI

EPA standards for Total Coliform and E. coli

- Total Coliform positive samples/mo. – 247 samples
- E. coli positive samples/mo. – 247 samples

Follow-up assessment required?

- Yes
- No

### CHLORINE

- Actual Average: 248 samples – 0.9 mg/L
- EPA Standard Max. 4.0 mg/L
- Tucson Water target average: 0.8 to 1.2 mg/L
March 2017

Tucson Water also monitors water quality at 9 separate and distinct community systems served solely by local groundwater wells – not from the main water distribution system. Hundreds of individual tests are conducted each year on these community wells to ensure well water is clean, safe and secure.

Catalina Water System
Catalina is a community partially served by Tucson Water. It has about 400 connections, supplying water to about 1,000 persons with water from two wells.

Corona de Tucson Water System
Corona de Tucson is a community located near Sahuarita and Houghton Roads, with about 2,600 connections supplying about 7,300 persons with water from three wells.
